DETAILED ACTION

1. This Office Action responds to Applicant's amendment filed on 12/24/2003.

Claims 9-26 are pending, wherein claims 1-8 have been cancelled and claims 9-26 are newly added. Claims 9-26 have been examined and are allowed.

Allowable Subject Matter

2. **Claims 9-26** are allowed.

3. The following is an examiner's statement of reasons for allowance:

As per **claims 9-26**, Applicant's amendment and arguments filed on 12/24/2003 set forth the patentability of Applicant's claimed invention, wherein as pointed out by Applicant, the independent claims 9 and 18, which the claims depend respectively, recite the method/computer-readable storage medium for reducing space for holding a representation of a routing network, comprising inventive steps/means of generating and storing, involving shared data structure, a set of unshared data structures, and a set of state information which is stored into each unshared data structure that enables the shared data structure to represent all of the elements in the group of elements in the routing network, as claimed, which the prior arts made of record failed to teach or suggest (see Applicant's amendment filed 12/24/2003, pages 1-2). Other prior arts made of record teach the use of shared or common data structures for routing configuration but failed to teach the inventive steps/means as claimed (see especially **Scales**, US Patent No. 5,761,729, especially abstract and col. 2, line 48 to col. 3, line 8; **Bly et al.**, European Patent Application No. EP 319232 A2, especially pages 7-8; **Mehrotra et al.**, US Patent Application No. US 2003/0088843 A1, especially col. 2,

paragraphs [0012] to [0013]). Accordingly, the claimed invention is novel and unobvious over the prior arts made of record.
